

HALOGEN PAR

Superior Life® Halogen lamps are engineered with the latest technology in filament design to deliver the longest lasting halogen par on the market.

SUPERIOR LIFE® HALOGEN

- **6000 USER HOURS**
- **13% ENERGY SAVINGS**
- **20% HEAT REDUCTION**
- **LAB TESTED TO LAST 33% LONGER THEN SIMILAR LAMPS ON THE MARKET**

In the competitive market to create the longest lasting halogen lamp, it's what's inside the Superior Life® Halogen Lamp that sets it miles ahead of the rest of the pack.

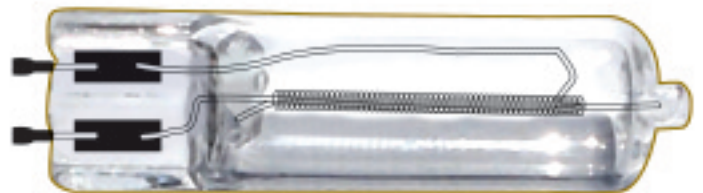

The filament is secured (hooked) on each end. This eliminates filament-pinching and crimping which inevitably leads to hot spots and premature lamp failure.

The lamp has molybdenum ribbon connectors embedded within the press seal of the lamp. The halogen burner is made up of aluminosilicate glass having a greater coefficient of expansion in high heat (between 36 and 40_10-7 per °C) which insures strong integrity of the lamp and seal (press area).

The halogen burner has thick walls and can be filled with gas to a higher than usual pressure, slowing down the evaporation of the tungsten from the filament.

A unique coating on the reflector allows the heat to escape from the back of the lamp while directing light out the front. Effectively, this reduces heat on temperature sensitive merchandise without sacrificing light quality.

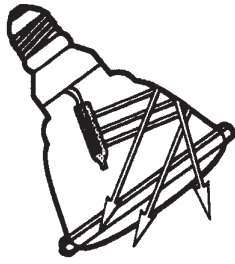

With a consistent light level throughout its life, the Superior Life® halogen proves that buying the best doesn't have to cost — it pays.

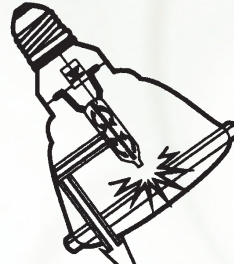

**THE SUPERIOR LIFE® HALOGEN PAR FILAMENT:
BUILT STRONGER, TO LAST LONGER.**

*Superior
Life®*

STANDARD
Wire supported filament resulting in distorted beam, shorter life

SUPERIOR LIFE®
RIGID QUARTZ CAPSULE
Ensures precise beam control through solid state design
